Address: Shantinagar, Kathmandu, Sindhupalchowk, Nepal (Home)

● ABOUT ME

I am a B.Sc. CSIT student with a passion for Data Science and Machine Learning, specializing in Python as my core programming language. I also have learning experiences in basic front-end languages (HTML, CSS, JS, JQuery). I enjoy working on fun, hands-on projects that align with my interests, allowing me to explore and experiment. With focus on learning and growing in the tech field, I am continuously expanding my skills in data analysis, machine learning algorithms, and problem-solving techniques. Outside of my studies, I am also an avid music enthusiast, and I do look out for soft-skill development opportunities around me.

● EDUCATION AND TRAINING

01/2023 – CURRENT Kathmandu, Nepal

BACHELORS IN COMPUTER SCIENCE AND TECHNOLOGY Orchid International College

Website <https://www.oic.edu.np/>

● DIGITAL SKILLS

Programming Languages

HTML 5: HTML/CSS/JQuery | Python-Programming | C C++ C Java | GIT version control, Linux Command

Libraries

Selenium (Using Python script) | Python (BeautifulSoup, csv) | Python, Scikit-Learn, Numpy, Matplotlib

Advanced

Data Science | LLM | Transformers

Soft-Skills

LaTeX (OverLeaf, VsCode) | Performances (Speaking, Music)

● PROJECTS

03/02/2025 – 22/03/2025

Job Search and Recommendation Chatbot

A Job Search and Recommendation Chatbot System based on AI.

- Extracted Data from publicly available Websites.
- Preprocessed Datas of different types.
- Passed it into LLM after Implementing RAG based generation techniques using vector db and transformers

Link <https://github.com/SsandeshH/joBot.git>

12/03/2025 – CURRENT

MusicMash

A side project based on HTML, CSS, JS and JQuery.

As I have interest in Music and Performances, I am developing web-based tool that would help me during my practices and performances.

- Features like :Transposer , Metronome , Ear Train , Tuner
